

Nixon Grafil W

Successful Lead Software Engineer having 8+ years of experience with excellent technical knowledge and a track record of delivering high-quality software solutions to clients. Skilled in mentoring team, designing and developing complex systems and leading successful software projects.

EXPERIENCE

Sept,2024 – Till Date

RAKUTEN, JAPAN

May,2021 – Aug,2024

FIDELITY INVESTMENTS

July,2019 – May,2021

ALTIMETRIK INDIA PVT. LTD (MSO AT PAYPAL INDIA)

Sept,2016 – July,2019

IVTL INFOVIEW TECHNOLOGIES PVT. LTD

STRENGTHS

- **TECHNICAL LEADERSHIP**

Led a team to complete project 45% under budget and ahead of schedule.

- **COLLABORATION**

Coordinated with cross-functional teams to deliver feature rich software on time. Had business interactions with business partners.

- **PROBLEM SOLVING**

Innovative solutions designed for complex business logics.

SKILLS

Frameworks & Primary Skills

Java, Python, Kubernetes, Docker, Node.js, Java Script(JS), React-js, REST-API & Microservices, Maven, GIT, Gradle,Apache KAFKA, ,Terraform, AWS, Hashicorp vault, Jenkins, Groovy, Spring Boot, Spring MVC, Spring Security, Spark, yarn, Hadoop, Prometheus, Grafana, Datadog, ELK, Kibana, Data structures.

Database

AWS Dynamo DB, Oracle DB, Cassandra DB, Mongo DB, Elastic Database.

EDUCATION

2012 - 2016

PONJESLY COLLEGE OF ENGINEERING (Anna university affl.)

B.E (Electronic and communication Engineering)

CERTIFICATION

2024

CERTIFIED KUBERNETES APPLICATION DEVELOPER (CKAD) – In Progress

2022

AWS DEVELOPER ASSOCIATE

MINI PROJECTS

Tool - windows

CQL SEPARATOR

An eclipse-plugin used to create separator CQL queries as a text file, from the latest DTO jar present in the local project file.

Tool - Web application

LEAVE MONITOR APPLICATION

A Tool to monitor employee attendance and their absence.

FILE COMPARISON REGRESSION TOOL - DATA ANALYTIC

A tool to help in Testing the analytical report with the RAW data, thereby reducing the manual testing effort by 100%.

PROJETS

Project #9

RAKUTEN- BOOKMARK API (SENIOR SOFTWARE ENGINEER)

This application is a Bookmark feature in Rakuten ichiba site, it allows the user to save the favorite items, shop and list of items. This system is designed in such a way to support a large userbase. My role is to **design and develop** the application. We support the production stability as well.

Skills used: Java 17, Spring Boot, MySql DB, KAFKA, Jenkins, Kubernetes, Prometheus, Kibana, Grafana.

Project #8

FIDELITY- BILLING PLATFORM REPORTING (TECHNICAL LEAD)

This application is a Billing Platform for the fidelity institutional clients. It calculates the basic as well as the custom charges for the institutional clients based on their contracts. This Is a Big Data processing Application, So I have **designed and developed** this platform using AWS EMR with the up-to-date industrial design standards. After release 0 issues were reported till date. This application has 100% accuracy on the billing cost and saves upto 45% of infrastructure cost.

Skills used: Java 17, Python, Spark, EMR, Lambda, S3, Secret manager, CloudWatch, Oracle DB, Terraform, Jenkins, Hashicorp vault, Maven, Datadog.

Project #7

FIDELITY- ORDER EXECUTION CAPTURE (LEAD DEVELOPER & SA)

In this API we accept the incoming order and persist the data in the respective tables. Then these orders are sent to the mainframe system using the KAFKA back-bridge pipe. Then the mainframe system will process this data. This has been successfully tested and deployed in the production at a very short duration.

Skills used: Java 17, Spring Boot, EKS in AWS, Oracle DB, KAFKA, Terraform, Jenkins, Kubernetes, Hashicorp vault, Prometheus, Datadog, Grafana.

Project #6

FIDELITY- BOPT SERVERLESS BATCH IN AWS (LEAD DEVELOPER & SA)

I have designed the entire system in AWS for an EOD batch to run in serverless pattern and have developed an End-to-End working model with zero downtime. This batch process will generate a that will be send to OCC at the EOD.

Skills used: Python, Lambda, S3, control-m, Hashicorp vault, Terraform, Jenkins, Datadog, CloudWatch.

Project #5

FIDELITY - ORDER NUMBER GENERATOR (LEAD DEVELOPER)

A **Tire-0** application, Where the trade flow system generates the order Numbers for each stock market orders. Delivers the **response in a matter of < 2ms avg.** It has a bulk reading capacity of 10K Unique order numbers. **Skills used:** Java 17, Spring Boot, EKS in AWS, Oracle DB, Dynamo DB, Cockroach DB, Terraform, Jenkins, Kubernetes, Hashicorp vault, Prometheus, Grafana, Datadog.

Project #4

PAYPAL - GLOBAL PAY LATER / BUY NOW PAY LATER

Created end-to-end APIs to deal with PayPal internal components for the EMI option and the repayment framework.

Skills used: Java 8, Spring Boot, SQL, Maven, Global rules engine, Kubernetes, PayPal internal tools, Kibana.

Project #3

INFOVIEW - PRENOTICE HUE-HR (LEAD DEVELOPER)

Guide and manage team to enhance the application to automate all pre-notice procedures hereby greatly reducing the required human intervention.

Skills used: Spring MVC, Java 8, JS, React JS, LESS, google closure, Elastic Database, Cassandra Db, KAFKA, Kubernetes, Gradle, AWS, ELK.

Project #2

INFOVIEW - PERFORMANCE REVIEW V1&V2(DEVELOPER)

Developed a system to review the yearly appraisal cycles through an integrated system with self-evaluation and clock-in/out. This helps the managers with employee productivity insights.

Skills used: Spring Boot, Java 8, Vue, JS, Elastic Database, Cassandra Db, KAFKA, Kubernetes, maven, AWS, ELK.

Project #1

INFOVIEW - CLOCK-IN/OUT HUE-HR (DEVELOPER)

An AI-infused enterprise suite that manages employee information, monitor the work sheet and analyze the overall employee performance for appraisal.

Skills used: Spring MVC, Java 8, JS, LESS, google closure, Cassandra Db, Jenkins, ELK.
