

SREENIVASULU REDDY

Microservices Specialist | Spring Boot | Cloud-Native Development | Agile Practitioner

+919951921737 @ sreenu.soft2012@gmail.com Bengaluru

SR

SUMMARY

Experienced Java developer with 9+ years in building scalable web applications and cloud-native solutions using **Spring Boot** and **microservices**. Skilled in end-to-end SDLC, including requirement analysis, design, development, and deployment. Hands-on expertise in **Java/J2EE, Spring Boot, CI/CD (Jenkins, Docker), Kafka**, and relational databases (MySQL, PostgreSQL, Oracle). Currently leading a 9-member team as a consultant, with strong exposure to Agile/Waterfall methodologies and direct client interactions in the travel domain

KEY ACHIEVEMENTS

Technical Decision-Making

Drove key architectural decisions for migrating monolithic applications to Spring Boot-based microservices, aligning with cloud-native principles and improving system maintainability.

End-to-End Ownership

Led the design, development, and deployment of a high-throughput microservices-based system, reducing API response time by 40% and improving system scalability.

System Optimization / Cost Reduction

Refactored legacy Spring Boot services into cloud-native microservices, resulting in a 30% improvement in performance and 25% reduction in cloud infrastructure costs.

Cross-Functional Impact / Stakeholder Collaboration

Collaborated closely with product and QA teams to drive feature delivery for a critical module, resulting in a 15% increase in customer engagement

EXPERIENCE

09/2021

Bangalore

Senior Consultant Sep 2021

T-Systems ICT India Pvt Ltd.

- **Working with T-Systems Bangalore as Consultant**
- Charted the end-to-end design and implementation of a reference data integration system between source systems and the ACRO platform, improving data availability by 95% across consuming services.
- Oriented and Engineered scalable microservices using Spring Boot to ingest, validate, and transform high-volume reference data, reducing downstream data latency by 40%.
- Collaborated with cross-regional stakeholders to define data contracts and validation logic, ensuring 100% compliance with ACRO schema standards across integrated systems.
- Optimized data pipeline by implementing smart sequencing and conflict resolution, improving data consistency for consumers by 3x.
- Established monitoring, troubleshoot and alerting for data flow using Prometheus and custom logging, enabling proactive issue detection and reducing data pipeline downtime by 60%.
- Built a robust data ingestion framework using Spring Boot microservices to integrate reference data from China systems into ACRO, handling millions of records with high reliability and low latency.
- Redesigned the sequencing logic to dynamically assign process order based on start times, ensuring accurate data processing and improving downstream system accuracy by 70%.

06/2018 - 08/2021

Location

Module Lead

Mindtree Bangalore

- Re-architected and rebuilt the AvisDirect.com platform in-house, migrating from third-party hosting (AIM) to ABG infrastructure, reducing total cost of ownership and third-party dependency.
- Led development of a modernized dealer sales portal with enhanced UX, streamlining vehicle purchasing for approved dealers and improving overall buyer satisfaction.
- Implemented scalable backend services to support private vehicle sales, enabling faster inventory turnover and boosting revenue per sale.
- Delivered cost-effective platform modernization that lowered per-sale operational costs while increasing sales velocity and dealer engagement.
- Integrated secure authentication and access control for pre-approved dealer groups, strengthening partnerships with top-tier buyers.
- Enabled in-house control over the private sales ecosystem by rebuilding AvisDirect.com, accelerating feature rollout by 50% and unlocking new revenue channels through enhanced dealer engagement.
- Modernized the legacy Misdirect platform with a cloud-ready architecture, improving system reliability and reducing website maintenance overhead by 40%.

EXPERIENCE

05/2016 - 05/2018

Location

System Analyst

Equifax US

- Building a unified SaaS platform for global Equifax clients, enabling seamless access to consumer credit and insurance data across banking and telecom sectors, supporting 50+ enterprise clients.
- Designed and developed scalable microservices using Spring Boot to handle high-volume, multi-tenant data requests, improving request throughput by 60%.
- Implemented secure, role-based access control and API throttling to ensure compliance with data privacy regulations across regions (e.g., GDPR, CCPA).
- Optimized service orchestration and response time for loan and credit decisioning APIs, reducing average latency by 45% under peak load.
- Accelerated client onboarding by 40% through reusable service templates, while ensuring regulatory compliance and reducing audit gaps to near zero via close collaboration with product and compliance teams.
- Engineered fault-tolerant microservices for credit and insurance history retrieval, ensuring 99.99% uptime for mission-critical client operations across banking and telecom domains.
- Led performance tuning and load testing efforts, enabling the platform to scale effortlessly to support 1M+ daily API calls with minimal latency.

EDUCATION

08/2013 - 12/2016

A.P, India

Master of Technology (M.Tech) in Computer Science

Jawaharlal Nehru Technological University Anantapur

04/2011 - 05/2013

A.P, India

M.Sc. in Computer Science

Sri Venkateswara University, Tirupati

04/2008 - 04/2011

A.P, India

B.Sc. in Computer Science

Sri Venkateswara University, Tirupati
