Bengaluru, India

PROFILE SUMMARY

- Amassed extensive experience exceeding 9 years in software development, emphasizing Java programming and warehouse management systems, while consistently striving to provide exceptional solutions that meet client needs.
- Currently leading the charge at Manhattan Associates by **orchestrating the design and execution of cutting-edge solutions** that significantly improve warehouse operations and streamline distribution center management.
- Progressed through various roles in the software engineering domain, acquiring a wealth of knowledge in **Java, Spring, Hibernate, and Agile methodologies**, while honing skills in integration testing and user acceptance testing.
- Realized substantial gains in operational efficiency through the **refinement of core product features customized to align with unique client demands**, ultimately boosting customer satisfaction and optimizing workflows.
- Cultivated a high-performing team of developers** by delivering expert technical guidance and nurturing a collaborative atmosphere that promotes creativity and effective problem-solving.
- Showcased proficiency in crafting and integrating sophisticated applications, notably the Western Union Kiosk application, which **enabled efficient communication between upstream and downstream systems via SOAP and REST APIs**.
- Leveraged extensive knowledge of warehouse management systems and their operational capabilities to deliver customized solutions that effectively align with client business goals and improve overall workflows.
- Proficient in leveraging advanced Java frameworks and tools, including Spring and Hibernate**, to develop scalable and efficient applications, showcasing a strong ability to adapt to evolving technology landscapes and client needs.
- Committed to continuous professional development**, actively pursuing certifications and training in emerging technologies to enhance both personal and team capabilities, ensuring alignment with industry best practices.

CORE COMPETENCIES

- | | | |
|---------------------------------------|------------------------------------|--|
| Software Development & Engineering | System Architecture & Design | Project Planning & Execution |
| API Development & Integration | Enterprise Application Development | Database Management & Optimization |
| Cloud & Containerization Technologies | DevOps & CI/CD Practices | Technical Leadership & Team Management |
| Requirement Gathering & Analysis | Software Development Lifecycle | Stakeholder & Client Engagement |

SOFT SKILLS

- | | |
|-------------------------------|--|
| Analytical & Problem-solving | |
| High Business Ethics | |
| Communication & Collaboration | |
| Leadership & Delegation | |
| Decision-making & Visionary | |

EDUCATION

2013: B. Tech in Electrical & Electronics Engineering from Madanapalle Institute of Technology and Science

2009: Intermediate from Sri Chaitanya Junior college 94.6%

2007: SSC from Christ the king high school 84.8%

CAREER TIMELINE

TECHNICAL SKILLS

Languages: Java, SQL

Frameworks: Spring, Spring Boot, Hibernate, JPA, JMS

Technologies: Microservices, Kafka, RabbitMQ, API development, GCP cloud, Kubernetes, Velocity, Freemarker, GKE cluster

Tools: Eclipse, IntelliJ IDEA, Git, JIRA, Splunk, Kibana, Docker, Gradle/Maven, SOAP UI, Postman

Database: MySQL, Oracle

Software Development: Agile, Scrum, Integration Testing, Unit Testing

UI: Angular JS

WORK EXPERIENCE

Since 2018: Manhattan Associates as Technical Lead

Responsibilities:

- Spearheading the design and implementation of innovative solutions aimed at optimizing warehouse functionality and enhancing distribution center management, ensuring alignment with client specifications and industry standards.
- Developing and integrating multiple features within the Warehouse Management (WM) system, with a concentrated focus on modules such as Receiving and Task, utilizing Java programming on the Spring/Hibernate stack to deliver robust applications.
- Enhancing existing product features to cater to specific client needs, thereby improving operational efficiency and ensuring that deliverables meet high-quality standards.
- Providing essential support during go-live phases, facilitating smooth integration, conducting user testing, and addressing any bugs or issues that arise to ensure a seamless transition.
- Leading a team of developers by offering technical solutions and guidance, fostering a collaborative environment that encourages knowledge sharing and innovation.
- Collaborating with cross-functional teams to analyze defects, troubleshoot issues, and ensure successful integration testing, thereby enhancing the overall quality of the software.
- Engaging in continuous learning and professional development to stay abreast of emerging technologies and industry trends, thereby enhancing personal and team capabilities.
- Provided mentorship to junior developers, fostering their professional growth and enhancing the overall skill set of the team.
- Technologies used Java, Spring, SpringBoot, Hibernate, JPA, Microservices, Kafka, RabbitMQ, API development, GCP cloud, Kubernetes, GKE cluster

2016 – 2018: HCL Technologies as Software Engineer

Responsibilities:

- Engaged in the design and development of software solutions aimed at enhancing warehouse management functionalities, ensuring that applications are robust and scalable to meet client demands.
- Collaborated with cross-functional teams to gather requirements, analyze business needs, and translate them into technical specifications for software development projects.
- Conducted thorough testing and debugging of applications to ensure high-quality deliverables, utilizing various testing methodologies to identify and resolve issues effectively.
- Assisted in the deployment of software solutions, providing support during the transition phase to ensure that clients are equipped to utilize the new systems effectively.
- Participated in code reviews and contributed to the development of best practices for software development, fostering a culture of continuous improvement within the team.
- Engaged in client interactions to understand their needs and provide tailored solutions that align with their business objectives, enhancing client satisfaction and loyalty.
- Maintained up-to-date knowledge of industry trends & emerging technologies to improve existing processes and solutions.
- Participated in Agile ceremonies, contributing to sprint planning & retrospectives, fostering a culture of continuous improvement.

PERSONAL DETAILS

Languages: English (Fluent), Telugu (Fluent) & Hindi (Intermediate)
