

SAMEER MISHRA

sameermishra1999@gmail.com | +91 9131186763 | Pune, India 411014

Summary

Results-driven Software Engineer with a focus on productivity and task efficiency. Expertise in Java, software architecture, and cloud computing enhances project delivery. Proven skills in problem-solving and teamwork lead to successful collaborations and project success.

Technical Skills

- Spring framework and Spring Boot
- Microservices architecture
- SQL and DB2
- Core Java 8, 11 and 17
- RESTful web Services
- Hibernate JPA
- Google Cloud platform/ AWS
- CI/CD - Jenkins
- Jira Project Management
- Service Now
- GitHub and Bitbucket
- Splunk monitoring
- AppDynamics performance management
- Datadog observability
- Software debugging
- Agile methodology
- Data structures and algorithms
- C++
- Performance optimization
- Testing and troubleshooting
- Shell scripting
- HTML and CSS
- React
- Technical Documentation skills

Work Experience

Equifax | Pune, India

Software Engineer Intermediate

09/2023 - Current

- Served as key developer for Fraud IQ application, a critical 24/7 electronic fraud detection system.
- Developed and maintained Java-based components using Java 8 and 17.
- Spearheaded the redesign of the billing module using Java 17 and Spring Boot, resulting in a 15% reduction in billing errors and an improved processing speed of 20% within one quarter.
- Implemented UI and backend enhancements with Spring Boot and Spring MVC by adding additional features.
- Automated legacy report extraction processes increase efficiency and reduce errors by 100%.
- Managed source code across multiple projects using version control tools.
- Analyzed user requirements, created technical specifications for software solutions, leading to an increase in user efficiency by 10%.
- Mentored junior developers, enhancing team efficiency and reducing ramp-up time.

Capgemini | India

Senior Software Engineer

06/2021 - 08/2023

- Developed the web API for the client, which helps with enrolling and calling other web APIs, and enhancing the existing web APIs as per the client's requirements.
- Developed java based Rest API module for a self service portal as per business requirement.

- Contributed to all phases of the development lifecycle, from design to writing and developing.
 - Upgraded Python version for data lake and developed Lambda code for enhanced functionality making it more efficient by 10%.
 - Conducted knowledge-sharing sessions on Git, testing, AWS, and product features for new hires which helped team to deliver the requirements 5-10 days prior to the committed date.
 - Authored automated Cucumber test cases for all endpoints, achieving over 95% test coverage.
 - Validated endpoints and created JUnit test cases while following Agile development processes by covering the 90% of the lines.
 - Implemented project requirements using Python in AWS Lambda with emphasis on deployment and testing.
 - Contributed to Java full-stack development utilizing React.js for improved user experience.
 - Enhanced online vegetable shopping project by adding cart module for seamless ordering process which helped in the billing of the application.
- Kaashiv Infotech | Chennai, India
Full Stack Developer Intern
 06/2019 - 07/2019
- I got trained & worked on the UI development part by using HTML, CSS, JAVASCRIPT & BootStrap.

Education

SRM INSTITUTE OF SCIENCE AND Technology | Chennai
Bachelor of Technology in Computer Science
 06/2021

- Related courses: Object Oriented Programming, Databases, Data Structures, Software Engineering
- GPA: 80

Websites, Portfolios, Profiles

- <https://www.linkedin.com/in/iam-sameermishra/>

Achievements

- Solved 250+ problems on leetcode.
- Certified Python and Java programming skills.
- Got a degree on Indian Classical Music.

Certifications

Google Associate Cloud Certification
