Experienced Java Software Developer with 6+ years in enterprise application development, microservices architecture, and automotive domain expertise. Proven track record in backend development using Spring Boot, REST APIs, and database technologies. Strong background in agile methodologies with client interaction experience across banking and telecom sectors.

EXPERIENCE

Consultant | Capgemini Technology Services India Limited |

Chennai, Oct 2023 - Present

- Led CreditMate development team (Standard Chartered Bank): provides an integrated platform for various workflow in credit organization and approval process
- Guided technical implementation of microservices architecture using Spring Boot, JPA, and PostgreSQL for real-time collateral monitoring
- Coordinated CI/CD deployment processes across teams and established comprehensive JUnit testing standards
- Collaborated with cross-functional teams to ensure regulatory compliance and secure data management practices
- Engaged in regular client interactions to understand business requirements and deliver customized solutions
- Designed and optimized REST APIs for seamless integration with downstream banking applications
- Technologies: *Spring Boot, JPA, Microservices, REST API, PostgreSQL, Oracle, Git hub, System Design*

Sr. Software Engineer | Renault Nissan Technology & Business Center India | Chennai, Jul 2019 - Sep 23

- HAPPI: Developed feedback management plugin integrated across multiple applications via REST APIs
- IDMO: Built diversity management web application for vehicle equipment lifecycle management with Swagger documentation
- Led agile development cycles with weekly business meetings and monthly sprint reviews
- Implemented robust data validation and error handling mechanisms for enhanced system reliability
- Optimized database queries and application performance resulting in improved response times
- Mentored junior developers and conducted code reviews to maintain coding standards
- Developed responsive web interfaces using Angular framework for enhanced user experience
- Integrated Apache Kafka for real-time data streaming and event-driven architecture implementation
- Technologies: *Spring Boot, JPA, REST API, PostgreSQL, Oracle, Git*

Software Developer | URS System Pvt Ltd |

Chennai, Apr 2018 - Jul 2019

- Customer Partner Interaction (VEON): Developed telecom revenue management system with charging and billing modules
- Created REST web services using JAX-RS and Spring framework
- Participated in requirement analysis sessions and contributed to technical design documentation
- Performed unit testing and debugging to ensure application stability and performance
- Collaborated with QA teams to resolve defects and implement enhancements
- Implemented database schema design and optimized SQL queries for improved data retrieval
- Developed comprehensive logging mechanisms using Log4j for effective system monitoring and troubleshooting
- Technologies: *Spring, Hibernate, Web Services, PostgreSQL, Git*

TECHNICAL | SOFT SKILLS

- **Languages:** Java SE, Java EE, SQL
- **Frameworks:** Spring Boot, Spring Core, Spring Security, Hibernate, JPA, J2EE, Microservices
- **Databases:** Oracle 11g, MySQL, PostgreSQL,
- **Developer Tools:** Eclipse, Vs code, IntelliJ Idea, STS, Maven, Git, SVN, Postman, Log4j, Jenkins, Docker, SonarQube, JIRA, Git Actions
- **Libraries:** JUnit5, Mockito, Collections, Apache Kafka
- **Others:** REST API, SOAP, XML, JSON, ORM, Design Patterns, Data Structures, Algorithm, System Design, AWS, Agile

EDUCATION

Pondicherry University, Pondicherry, India

Master of Computer Application (MCA)

Percentage : 72%

2015
