ABOUT

Experienced Java Backend Developer with 4.5+ years of expertise in building scalable, reliable backend systems using Java, Spring Boot, and REST APIs. Skilled in the full development lifecycle, with a strong foundation in microservices and system design. Proven ability to adopt and work with emerging technologies to solve real-world challenges and improve system performance.

EXPERIENCE

TATA Consultancy Services, Software Developer - Chennai [October 2020 - Present]

- My primary responsibilities included developing REST APIs and SOAP APIs using multiple AWS services like S3 and Lambda to process batch data like passenger details , flight schedules in an Agile Environment projects.
- Individually developed a REST API leveraging Apache Kafka for real-time stream ingestion and emission via Kafka topics and stream filtering using KSQL over a distributed Kafka cluster, and containerized and deployed on Kubernetes.
- Built APIs to handle real-time data using MQ, SQS, Kafka, and AWS EventBridge.
- Also worked on multiple applications in different design patterns like Saga, Circuit Breaker, API Gateway to effectively manage synchronous and asynchronous microservice communications.
- Developed a critical SOAP API hosted in EC2 which on a scheduler-basis fetches check-in related data from DB via Stored procedures and delivers to the downstream via SQS.
- Proficient in working with data formats including JSON, XML, and Avro and also strong experience in designing and implementing schemas using JSON Schema, XML Schema (XSD), and Avro Schema for data validation and structure definition.
- Also integrated custom authentication and authorization flows using OAuth 2.0, JWT, LDAP, and API keys within multiple Spring Boot microservices architecture.
- Have hands-on experience in Docker and have also automated the deployment process through different CI/CD pipelines like Gitaction , Bamboo , Argo CD.

SKILLS

Programming Language :- JAVA ,MySQL ,KSQL[Basics].

AWS Services :- EC2 ,S3 ,Lambda ,SQS , SNS ,Step Function , EventBridge ,CloudFormation, CloudWatch.

Framework and Technologies :- SpringBoot , REST Architecture ,Microservices ,Kubernetes, Docker,Junit,JaCoCo,JPA ,Apache Kafka ,MQ.

Tools :- Datadog ,Splunk ,Bamboo ,ArgoCD ,Github ,JIRA ,Confluence.

Other :- Data Structure and Algorithms ,Karate Automation Framework [Basics]

EDUCATION

SASTRA UNIVERSITY, B-Tech [Information Technology]

June 2015 - May 2019
