Profile Summary

Experienced Developer at Capgemini Technology Services, proficient in Java, SQL, Spring boot and microservices . Skilled in developing efficient and high-performing applications, seamlessly applying technologies to backend processes, and processing the data. Adept at deploying and managing scalable solutions on PCF, with a strong commitment to excellence in development assignments.

Education

B.Tech/B.E., 2019

JNTUA college of engineering,kalikiri

Work Experience

Apr 2024 - Present

Consultant

Capgemini

- Specialized in API development, responsible for designing and implementing robust and efficient backend systems.
- Created APIs to facilitate seamless communication between various systems, including those for debit card activation.
- Leveraged expertise in Enterprise JavaBeans, Java, and SQL to develop secure APIs, ensuring smooth transactions for users.

Jan 2020 - Apr 2024

Java Developer

TATA CONSULTANCY SERVICES (TCS)

- Ensured seamless integration of Java-based applications with databases, APIs, and other systems.
- Reviewed code and debugged errors to improve performance.
- Improved system stability and performance by identifying and fixing critical bugs.
- Solved complex technical problems by leveraging deep knowledge of Java frameworks and libraries such as Spring Boot and Hibernate ORM.
- Proactively researched and evaluated new technologies, frameworks, and tools to stay current with industry trends and advancements related to microservices.

Projects

15 Months

Key skills

- Agile Methodology
- Testing Tools: JUnit Mockito
- Version Control Tools: GIT
- Expertise in AWS Cloud
- Theoretical Knowledge on Kafka Docker
- JavaScript React JS
- Pivotal Cloud Factory
- Kafka
- MySQL
- Spring Boot
- Spring Security
- Hibernate / Jpa
- Integrated Tools: Eclipse IntelliJ Spring Tool Suite Kafka Redis
- Postgresql
- Java
- JDBC
- Microservices

Synchrony - Credit Service Layer

- Spearheaded the development and implementation of a spring boot microservice that facilitated the processing of 30M cases monthly, deployed on cloud across 2 different regions.
- Designed and executed an automated process for credit autopayment, encompassing requirement clarification, contract negotiations, story planning, and development.
- Implemented a robust retry mechanism to handle and process failure accounts, ensuring minimal impact of system failures on the workflow and output.
- Utilized internal reporting microservice to generate and distribute detailed account processing reports via email, enhancing information dissemination and capturing critical account details.
- Developed and deployed a spring boot microservice to support the real-time alert system, processing 2.3M records daily for alerts on missing self-reported income, strengthening the monitoring and alert mechanism.

14 Months

Nielsen Media

- Enhanced an application using Java and Spark coding for TIBCO, specifically CCB
- Developed functionality to calculate coverage, count, and breakout values of media programs
- Utilized AWS cloud services including EC2, S3, Lambda, and CloudWatch to connect to the database, retrieve and store data applying business logic

14 Months

EURONET

- Euronet is a global provider of electronic payment and transaction processing solutions. They offer services like ATM and point-of-sale (POS) processing, card outsourcing, money transfer services, and more, operating in over 200 countries and territories.
- Developed on renaissance portal which is a product of Jalin. It is a client of EURONET. It mainly contains of the applications like ATMC, Debit Card and QRCB which mainly handles on the reports of the transactions.
- Handled the errors on transaction code by using the technologies java and SQL.

24 Months

USAA

- USAA is an American financial company providing banking and insurance domain products exclusively to the members of US Armed forces and their families.
- Developed on File Inventory project mainly focussed on the reports.
- Designed and implemented the code to implement the conditions as per the client requirement using technologies Java.

Certification

- C Programming Language

KEY PARTICIPATIONS

- Attended workshop on C programming conducted by Andhra Pradesh State Skill
- Attended workshop on Big Data and Cloud Computing conducted at JNTUA CEK.

- Attend workshop on Data Structures conducted by ABC for Technology Training.
